

August 20, 2018

Dear Intermatic Customers,

Intermatic strives to provide products that symbolize our strong brand name in the industry and unparalleled service, quality and support. We constantly seek to control costs while providing you the highest possible value. However, in light of recent raw material inflationary pressures and increased transportation costs, it is necessary for us to implement a price increase. Effective October 1, 2018, Intermatic will implement an increase of **5.3% across all products.**

We value your business and thank you for your continued support.
